

# eDiscovery on *your* terms

## HP eDiscovery OnDemand

Today's eDiscovery professionals must be able to quickly respond to requests and investigations, while reducing costs at the same time. But technology can be the stumbling block that prevents many from achieving these goals—especially when legal teams spend more time and money managing hardware and software than they spend on their litigation process. Fortunately, cloud environments offer a more secure and cost-effective way. A new self-service style of IT is emerging that can help you remove the IT burden and gain an optimal mix of control, speed, simplicity, and cost.

### Take an effective on-ramp to eDiscovery

Despite many advances in the eDiscovery market over the past several years, very little has changed in how this software is delivered. Historically, two primary options were available: a fully hosted model that inherently delivered less control over the data and process, or an on-premise model that placed an IT burden on the organization to install, manage, and maintain the technology.

As market needs have evolved, so too has the need for a new form of delivering eDiscovery technology. Today's organizations want to greater control over the eDiscovery process while also taking advantage of the simplicity, economies of scale, built-in-security, and scalability of a cloud-based offering. The advantages of an on-demand are numerous: it doesn't require a compromise on control or cost, or include added hassles, but does allow you to focus more on the legal matter rather than managing the technology.

### The latest eDiscovery platform without the IT burden

HP eDiscovery OnDemand offers legal teams rapid access to the latest, market-leading eDiscovery platform—without the burden of deploying and managing technology. It is well suited for small- and mid-sized businesses, as well as consultants, service providers, and law firms that have historically not had the appetite to outsource to a third party hosting provider or the resources and infrastructure to support an on premise model. HP eDiscovery OnDemand can give you an advantage over competitors at larger organizations. When you have access to the same tools as colleagues at larger firms, you can better compete in the market, achieve potential new revenue streams, and deliver greater value for your clients.

HP eDiscovery OnDemand offers legal teams rapid access to the latest, market-leading eDiscovery platform—without the burden of deploying and managing technology.

### HP eDiscovery OnDemand

HP eDiscovery OnDemand is purpose-built for eDiscovery in the modern era, combining the best of the industry-leading technology with HP Autonomy's highly secure private cloud. Based on the same HP eDiscovery technology that is trusted by some of the world's largest and most demanding organizations, this end-to-end solution combines eDiscovery processing, early case assessment (ECA), review, analytics, and production into a single on-demand offering. Now, your legal teams can quickly and easily upload content, and begin analysis and review without having to procure or manage hardware or software.

HP eDiscovery OnDemand is delivered via HP Autonomy's battle-tested private cloud, which undergoes regular third-party audits that include testing operational processes, personnel, and security—a step that other eDiscovery hosting vendors avoid.

### A more efficient eDiscovery model

With HP eDiscovery OnDemand, you can accelerate the eDiscovery process by taking advantage of these capabilities:

- Reduce up-front data staging
- Remove third-party providers, along with their associated costs
- Reduce the risk of spoliation by eliminating risky hand-offs between systems
- Provide access to industry-leading analytics from HP Autonomy
- Allow remote/joint legal teams to more effectively work together in a Cloud-based environment
- Incorporate all key eDiscovery functions into a single solution that works seamlessly together, ultimately delivering material time and cost savings

### Flexible deployment options

HP eDiscovery OnDemand is available as a stand-alone solution, or it can be combined with HP's world-class eDiscovery service team for a full-service offering.

OnDemand: a contemporary approach to eDiscovery that blends the best of both traditional methods of delivery.

## Use Cases

- Smaller case matters and investigations
- Time-sensitive case assessment and preparation
  - 26(f) "Meet and confer" preparation
  - Rapid Early Case Assessment
- Cost-effective internal or regulatory investigations
- Quick analysis of opposing party productions
- Multi-party collaboration in a shared, secure environment
- Platform for third-party vendors, service providers, or consultants
- Test drive the market-leading platform before switching vendors

## Key features

- Pre-established templates and workflows enable a quick start
- Rapid, on-demand document upload and processing for near real-time case review
- Access to leading-edge technology and analytics based on HP's IDOL technology
- Access to a single solution that combines processing, early case assessment, analysis/review, and production, as well as:
  - Self-service processing
  - Support for relevant data types including audio and video
  - Full workflow tools included
  - Reporting
  - Production into commonly accepted formats
- Data hosting in a secure, SOC2 audited environment that conducts regular penetration testing and vulnerability analyses
- Support for smaller matters, with low data minimums, for a low barrier to entry
- Optional assistance from HP's Hosted eDiscovery service professionals 24/7

## eDiscovery that suits your needs

HP Autonomy remains a visionary thought leader in the eDiscovery market by changing the paradigm of how eDiscovery software has traditionally been delivered and licensed. As the market trend leans clearly towards the cloud and away from costly on-premise hardware and hosted processing fees. HP eDiscovery OnDemand leads the way to a new style of IT for the legal industry, ultimately allowing eDiscovery professionals to focus more on eDiscovery and less on managing technology.

HP's eDiscovery OnDemand solution allows all customers to take advantage of cloud computing to gain greater control over the full eDiscovery process, while the added benefits of industry-leading analytics minus the substantial up-front investment.

## Next steps

With hosting services available on a per-matter basis, for your next case matter or investigation, consider learning more about why HP eDiscovery solutions are the most trusted, from small document cases and investigations to the world's most complex matters. Contact the HP eDiscovery team at [autonomyinfo@hp.com](mailto:autonomyinfo@hp.com) or call or +1 415-243-9955 to request a demonstration and proposal on how HP Autonomy can help you reduce both the time and effort involved in managing your legal matters and investigations.
